

GÖKTEKİN ENERJİ CORPORATE ENVIRONMENTAL AND SUSTAINABILITY POLICY

We will continue all our work in our renewable energy electricity generation, engineering, procurement, construction activities and our investments within the frame work of existing environmental legislation and regulations and with the **GÖKTEKİN ENERJİ CORPORATE ENVIRONMENTAL and SUSTAINABILITY STANDARD**, which we have prepared in accordance with local laws and international standards, we are superior in order to go beyond the expectations of our stakeholders. As **GÖKTEKİN ENERJİ** we are committed to making an effort.

Within the scope of this commitment, we adopt the following principles as a principle:

We monitor our environmental and sustainability performance, go beyond compliance with the legislation and establish our environmental management system with the **GÖKTEKİN ENERJİ CORPORATE ENVIRONMENTAL and SUSTAINABILITY STANDARD**, which we have prepared in line with international environmental standards. We share the environmental performance and responsibility projects that we constantly monitor in line with the Environmental Policy, in the reports we publish. We determine the priority issues in accordance with local and global trends, and update our environmental policy when necessary and share it with our stakeholders.

In its processes, we accept compliance with the applicable environmental legislation and administrative regulations, all legal and other requirements to which it is bound, and international environmental sustainability standards as a basic requirement and we fulfill this requirement.

In order to ensure that the environment and sustainability are integral parts of our operations, we include our relevant strategies, goals and objectives in the environment and sustainability action plan, and we create an annual training plan for all our employees to adopt and implement our environmental and sustainability standard.

By complying with the **GÖKTEKİN ENERJİ CORPORATE ENVIRONMENTAL and SUSTAINABILITY STANDARD** requirements, we encourage participation and innovation culture among stakeholders in order to continuously improve and increase the effectiveness of management systems and we provide adequate resources. We continue our sustainability efforts uninterruptedly.

We take great care in designing, implementing and operating local resources (solar, biomass, wind) in the most efficient and environmentally friendly way. We aim to use all clean and natural energy resources efficiently and economically by promoting the increase in efficiency and the use of new technology. We conduct research studies for the protection of biodiversity in our Project areas and develop environmental responsibility projects. We take care to develop projects suitable for bird migration routes in all areas we operate especially in our wind power plant projects and to protect and improve the ecosystem, habitat and biodiversity in all our renewable energy projects.

Considering the environmental factor in the evaluation of all projects, operations and environmentally friendly products, we give priority to the use of materials with less polluting properties and to create reliable and robust process dynamics in all processes.

We perceive any waste disposal process as a loss of natural resources and aim to develop methods to prevent pollution at its source. We work on waste reduction, reuse, recycling and recovery.

While determining the scope, the method and targets of the **GÖKTEKİN ENERJİ CORPORATE ENVIRONMENTAL and SUSTAINABILITY STANDARD**, we receive the contributions of all our employees, customers, business partners, investors, stakeholders and senior management.

We aim to develop expand and maintain environmental awareness throughout our company, we encourage our business network, especially our employees and business partners, to carry out environmental responsibility activities and develop environmental responsibility projects, and we aim to lead in this area.

Best Regards,
Abdullah GÖKTEKİN
Chairman of the Board
